Agenda featuring John Hart, Wildlife Biologist, Custom Wildlife Capture and Consulting, LLC

- Introduction to wolf biology in relation to trapping in agricultural landscape
- Trapping techniques, equipment, and strategies
- Wolf population management
- Characteristics of predator kills
- Working with producers
- Requirements for working under Targeted Predator Removal Program

John is a certified wildlife biologist with a wildlife degree from the University of Wisconsin. Involved with wolf damage management in northern Minnesota since 1989, he has extensive experience with the capture of depredating wolves, training, the supervision of trappers, and assisting with the development of the Minnesota Wolf Management Plan.

Please register before Sept. 25, at 1-844-769-6224 or agriculture@gov.mb.ca

October Workshops to follow in Teulon and Birds Hill Provincial Park.
